THE OPPORTUNITY

Nigeria's waste problem is a technology gap

Nigeria generates an estimated 32 million tons of solid waste per year, yet only 20–40% is formally collected in urban centers. Uyo, the Akwa Ibom State capital and home to roughly 475,000 people, has grown rapidly on oil revenue and civil service employment. Still, its waste system remains informal, cash-based, and entirely uncoordinated.

Residents pay unverified collectors with no recourse when service fails. Environmental regulators have no real-time visibility into which streets are served or how much waste is collected. Meanwhile, over 68% of Uyo residents already own a smartphone; the digital readiness is there, the service quality is not. That gap is TidyNaija's opportunity.

32M tons Solid waste generated / yr (Nigeria)	20–40% Formally collected in urban centers	68%+ Uyo residents with a smartphone	~475,000 Uyo metro population
--	---	--	---

Where the problem is most visible

- Open dumps line Liberation Avenue, Udo Udoma Avenue, and Ikot Ekpene Road — some of Uyo's busiest corridors.
- Households in GRA, Ewet Housing, and Shelter Afrique pay ₦1,800–₦4,000 a month to informal collectors, with no guarantee of service.
- Every transaction is cash — no receipts, no accounting, and significant fee leakage for operators.
- The University of Uyo and Akwa Ibom State University together add ~40,000 students with no structured collection nearby.

THE SOLUTION

One platform, three sides of the market

TidyNaija is a three-sided digital platform connecting residents, waste collectors, and government in a single system built for how Nigerians use their phones, mobile-first, optimized for 3G/4G, with USSD fallback for non-smartphone users.

CONSUMER APP Residents and businesses schedule pickups, pay digitally, and track collectors in real time.	COLLECTOR APP AI-optimized routes and job management for waste operators — cutting fuel costs by up to 30%.	GOVERNMENT DASHBOARD Live sanitation intelligence and compliance reporting for AKSEPA and city regulators.
---	---	--

Why now

- Zero digital waste competitor exists in Akwa Ibom State — TidyNaija enters a completely uncontested market.
- AKSEPA is actively seeking smart compliance tools, creating a natural government anchor partner.

— Founder proximity to Uyo's neighborhoods, collector networks, and government relationships is a non-replicable early moat.

MARKET SIZE

A clear path from Uyo to a ₦1.58bn obtainable market

TidyNaija's Uyo-first strategy targets a defined, addressable slice of a much larger state and national opportunity — proving the model before expanding city by city.

Segment	Estimate (₦/yr)	Basis
TAM — Akwa Ibom State	₦18.2 Billion	1.8M urban pop. × ₦10,100 avg. annual waste service value
SAM — Uyo & environs	₦5.4 Billion	475,000 Uyo pop. × 60% addressable × ₦19,000 ARPU
SOM — Year 1 (Uyo)	₦158 Million	3,500 households + 80 commercial clients + 1 govt. contract
SOM — Year 3 (3 cities)	₦1.58 Billion	38,000 households + commercial + govt. across Uyo, PH, Calabar

BUSINESS MODEL

Recurring revenue across households, businesses, and government

Seven revenue streams give TidyNaija durability across market segments — anchored by predictable household and estate subscriptions, with high-margin government and data contracts layered on top.

Household & estate pricing

Plan	Frequency	Price	Notes
Basic	2x / month	₦1,800/mo	Scheduled collection, digital receipt
Standard	Weekly	₦3,500/mo	Real-time tracking, push notifications
Premium	2x / week	₦6,000/mo	Priority dispatch, recycling segregation
Estate Standard	Weekly/unit	₦2,200/unit/mo	Facility manager dashboard, 20-unit minimum

Unit economics

Metric	Household	Commercial	Government
Avg. monthly revenue	₦3,200	₦22,000	₦1,500,000
Customer acquisition cost	₦3,500	₦15,000	₦180,000
Lifetime value	₦38,400	₦440,000	₦54,000,000
LTV : CAC	11x	29x	300x

ROADMAP

Uyo-first, then South-South, then national

The founding round funds a 12-month Uyo proof of concept before any multi-city expansion — de-risking the model before it scales.

Phase	Timing	Focus	Target
Phase 1 — Uyo MVP	Months 1–12	Build, pilot, and prove the model in Uyo	3,500 active HHs · ₦48M revenue
Phase 2 — South-South	Months 13–30	Port Harcourt + Calabar, Seed-funded	38,000 HHs · ₦620M revenue
Phase 3 — National scale	Months 31–60	Abuja, Lagos South, Kano + 14 cities total	210,000 HHs · ₦3.24B revenue

Year 1 quarterly milestones (Uyo)

Quarter	Milestone	Success metric
Q1	Build & pre-launch — apps, backend, 20 collector onboardings	Beta-ready product; AKSEPA intro meeting
Q2	Zone A soft launch — GRA + Shelter Afrique	500 active households; NPS > 35

Quarter	Milestone	Success metric
Q3	Zone B expansion — Ewet Housing + Uyo Township	1,800 HHs; 10 commercial clients
Q4	City consolidation, AI routing v1 live	3,500 HHs; ₦48M annualised revenue; Seed raise initiated

FINANCIAL PLAN

Five-year path to a 28% EBITDA margin

Revenue scales from a single-city pilot to a 14-city national footprint, with margins improving steadily as fixed platform costs are spread across a growing subscriber base.

Metric	Year 1	Year 2	Year 3	Year 4	Year 5
Revenue (₦M)	48	185	620	1,580	3,240
Gross margin	42%	48%	54%	60%	64%

Metric	Year 1	Year 2	Year 3	Year 4	Year 5
EBITDA margin	-85%	-42%	-8%	15%	28%
Active households	3,500	12,000	38,000	95,000	210,000
Cities active	1	2	3	8	14

FUNDING ASK

Raising ₦5–7 million to prove the model in Uyo

This lean founding round funds the MVP build, onboards the first cohort of waste collectors, and acquires the first 500 paying households, demonstrating proof of concept ahead of a larger Seed round.

CURRENT ROUND

₦5,000,000 – ₦7,000,000 founding/pre-seed · Q2 2026 · MVP build, Uyo pilot launch, first 500 households

Funding roadmap

Round	Amount (₦)	Timing	Primary use
Founding / Pre-Seed (current)	5,000,000 – 7,000,000	Q2 2026	MVP build, Uyo pilot launch, first 500 households
Seed (target)	400,000,000 – 600,000,000	Q1 2027	City-scale Uyo + Port Harcourt expansion
Series A (target)	3,000,000,000 – 4,000,000,000	Q3 2028	8-city national rollout, AI v2, government contracts

Why TidyNaija, why now

- First-mover in Uyo — no competing digital waste platform exists anywhere in Akwa Ibom State.
- Asset-light model — licensed operators haul, TidyNaija facilitates, optimizes, and accounts, like Uber relative to drivers.
- Data compounds with scale — every pickup logged sharpens the routing and demand models, widening the gap versus any future entrant.
- A government anchor in Year 1 creates regulatory legitimacy and switching costs that protect market position.

Let's build cleaner cities together

TidyNaija Technologies Ltd. is welcoming conversations with investors and partners who want to back Nigeria's first AI-powered waste management infrastructure — starting where the opportunity is clearest.
